Opening statement

I would describe myself somehow as a talented technician that, over years, became an executive player. This transformation has been half inspiration, half engagement. My communication and leadership skills allowed me to glue both technician and business worlds and that is the core of my business profile.

I have always embraced challenges naturally with positive mood and lots of energy, acknowledging the difficulties ahead of me but also with strong confidence to succeed.

As an engineer, I am used to design and implement solutions and services. As a CTO, I lead (and manage) the technical teams to do so while I extend my duties to work the P&L or define business strategies while being the technology image of the company at media, events or publications.

I consider myself to be a team player, a good leader, and a very versatile person able to lead engineering teams, create solutions, establish alliances, and contribute to marketing campaigns amongst others.

Key Skills

- **Master in Data Science (AI).** Recognized voice in AI applied to different industries. Defining AI solutions and platforms to large enterprises. From design-thinking to efficient and sustainable operations.
- **Data Driven** evangelist, defining and implementing Data frameworks and methodologies
- **Hybrid Cloud** – Defining Landing Zones and migrate/modernize applications with Kubernetes and Cloud Services.
- **Proactivity against dynamically changing technologies** including application development technologies, container platforms, the native cloud, Data and AI.
- **Subject Matter Expert on Kubernetes and Openshift** and the container landscape in general.
- Proven experience in **managing, mentoring and leading** large engineering and development teams.
- **Speaker** - Kyndryl **Top voice** in Spain and Portugal on Data, AI and Cloud subjects with publications, conferences and being panel member of a variety of events.

Professional Experience

Chief Technology Officer (CTO) for ADAI at Kyndryl Spain & Portugal

(November 2021 – Present)

Kyndryl created a practice named **Applications, Data and AI** scoping the definition of the strategy, assets and solutions to be delivered which was created after the IBM hard spin-off. Kyndryl was born as an independent company from the Technology brand of IBM and it required to open a new area of business development with focus on the application and business to which I was designated as CTO. Also, thanks to my cross knowledge, I also lead areas such as the Academy of Strategy and Innovation or the Cloud area for Containers and others.

Achievements and responsibilities:

- Lead expert team to **define ADAI solutions** for customers and for Kyndryl
- Creation of the **ADAI portfolio**
- Multiply x4 the business results on signings.
- Member of “**Fundación COTEC**”
- Creation of the **Academy of Strategy and Innovation**
- Kyndryl **Top voice** in Spain and Portugal on Data and AI, with publications, conferences and being panel member of events.
- Lead **Cloud Advisory Services** team by creating the Enterprise **Landing Zone** concept to design and implement landing zones automatically.

Client Solutions Executive and Lead European Architect at IBM GTS, Spain

(May 2018 – November 2021)

IBM in Madrid developed an innovative solution to provide de-centralized services for Kubernetes-based platforms within an expert team with the unique selling offer of design, build and manage those platforms. I joined the team when it was on the verge of major successes in the European market

Achievements and responsibilities:

- **Lead European Architect** on both pre-sales and consultancy services for projects implementation with 50+ projects sold and implemented with Kubernetes, Openshift and the Cloud in different forms
- Key role on **IBM Services for Container Platforms** strategy definition and architecture design
- Leading several projects empowering local account and customer guilds with the T&T projects in markets such as Financials, Retail, logistics or Aircraft MRO on a variety of technology such as Blockchain, Microservices, Elasticsearch, Kafka and much more

Chief Architect / Technical Director at Innofis ESGM, Spain

(November 2016 – May 2018)

Innofis is a company that focuses its business on digital banking solutions with a big presence in Middle East. Within Innofis plan to expand inside current markets and new ones I am leading the evolution from consulting projects to a new product-oriented strategy by adapting its technologies to the Cloud.

Achievements and responsibilities:

- **Chief Architect** responsible of define and lead Innofis' products and solutions with a considerable variety of solutions including **Netflix Microservices, DevOps strategies and Openshift**.
- **Pre-sales key role** creating Innofis' technical strategies and participating at all the stages of the sales process.
- **Manage Technology Office resources** working closed with project managers to assign architects and control the evolution of the projects to guarantee the quality of the final deliverables.

During the last year I led the transition from custom monolith projects deployed at application servers to configurable microservices deployed at Openshift as docker containers. And, as all this is done for banking solutions, the security has never been negotiated.

Technical Architecture Consultant at Accenture, Spain

(July 2015 – November 2016)

After the acquisition of Londoner TSB bank, Banc Sabadell started the IT systems development by evolving and adapting their Spanish systems.

Achievements and responsibilities:

- **Project Manager of the Development Architecture** area and work stream.
- Define and execute the **Continuous Integration & Continuous Deployment Lifecycle** for 3 different application types: AngularJS SPA, Spring Cloud microservices and TIBCO SOA services.
- Define and provide required **Tools** for servers and for local environments.

In progress tasks and responsibilities

- **Responsible of defining a Container Architecture Reference (Docker)** that will help the bank to select the most suitable **Platform as a Service (PaaS)** approach and product that will run in a hybrid Cloud.
- **Project Manager of the Operations Architecture** team that ensure the correct provisioning, maintenance and support of the physical and logical topology to host the System.

JEE Architect at Indra Sistemas S.A., Spain

(February 2006 – July 2015)

Long experience at Indra working as Java Architect team leader for really big projects regarding to taxes collection.

The experience at Indra includes evolution of existing applications and developing applications from scratch.

As the technical leader of the company in taxes area the following achievements and responsibilities can be highlighted:

- **Participate in sales** opportunities covering technical points, writing offers or on-site consultancy.
- **Key role in the technical subcommittee** leading the meetings where the technical tasks and decisions are communicated and discussed.
- Analyze, define and implement suitable tools and technologies for the **application lifecycle**, usually with maven and Continuous Integration.
- **Define and implement end to end JEE architectures** always focused on **Quality of Systems** separating in n-tier layer with well-defined roles and responsibilities.
- Work closed to functional teams for getting the best approach to user requirements in order to define the better **user experience** implemented with web technologies (mainly jsp, ajax, html5 and css3).
- Participate in **infrastructure definition** and servers start up.
- **Documentation** of the architecture plan, guide for developers and executive presentations for committees.
- Regular **training for developers** in code development, methodologies and technology trends.
- Apply **Enterprise Integration Patterns** for internal and external systems integrations supported by Apache Camel as Mediator Service of the architectures.
- Architecture team **planning and management** always keeping in balance technology and project purposes and needs.

Java analyst at KEAPPS Consultores Información S.L., Spain

(November 2004 – January 2006)

Working as a Java programmer and (at the end) as an analyst in a regular contractor of Indra.

Visual Basic analyst at vMark Software España S.A., Spain

(May 2001 – November 2004)

Working from programmer to analyst in many little and middle size projects with Visual Basic and UniVerse database.

Academic information

Universidad Oberta de Catalunya – UOC

(February 2021 – February 2023)

Máster en Data Science – Data Science Master

Universidad Aut6noma de Barcelona – UAB

(September 2001 – June 2005)

Ingeniero T6cnico en Inform6tica de gesti3n – Technic Engineer at Software Engineering
